4.msgHereIsGlass(glass)

Previous Conveyor Family pcf

This ConveyorFamily tcf

Next ConveyorFmaily

2.msgConveyorStop()

3.msgConveyorStart()

5.msgConveyorStop()

6.msgConveyorStart()

This is the diagram within conveyor families, the numbers in the msg doesn't make too much sense because it can change according to what is going on in side the conveyor family, according to the professor, I use popup as the end of a conveyor family and sensor as the start of a conveyor family
